Eskom’s 3 phase mains terminate at the Primary Building redundantly supported by a 500KVA genset in the event of Load Shedding, the Genset powers both buildings, however, 60KVA Uninterruptible Power Supply Systems bridge the gap between the power cut and the Genset powering up by seamlessly maintaining adequate clean power supply to all red and blue plugs until the Genset kicks in within 120 seconds. The abridged UPS units shall be deployed in 2 different UPS rooms, one at primary, and the other at secondary, both UPS rooms require adequate air conditioning deployed and refurbishment to close louvre gaps that permit dust and undesirable weather elements to ingress (cabling exists). Bidders are encouraged to propose industry standard ventilation methods. The server room requires an industrial standard integrated HVAC cooling system, Fire Detection, and Suppression Systems, fully equipped with SNMP modules for control and monitoring via web-based GUI/Portal, whilst the network patch rooms situated one in every floor (a total of 4 floors) will require adequate air-cooling system for a standard network patch room. Bidders encouraged to indicate in their proposal the Original Equipment Manufacturers standard warranty and cost of extended warranty on hardware and equipment. It is assumed ICT Administrators technical user training and skills transfer is inclusive for 5 ICT administrators for the equipment, products and software proposed herein.
